

SWECO®

QUICKCHANGE™ PT SEPARATOR

FAST, SIMPLE, AND SAFE SCREEN CHANGING

Screen changes have never been easier or faster than with the operator-friendly QuickChange™ PT from SWECO®. The QuickChange PT reduces screen changing to a one-man operation, greatly reducing the necessary labor and eliminating the need to involve maintenance crews. This pneumatically powered lift system is operated by simply turning a switch, and the motor start-up interlock and slow raise/lower cylinders add to the safety of the system. Screen changes can be made safely and quickly, significantly reducing downtime and greatly increasing productivity.

Another SWECO innovation that separates us from the rest.

**THE PNEUMATIC LIFTING CYLINDERS
LIFT THE FRAMES TO ALLOW
FOR EASY SCREEN REMOVAL**

**ACCESS ANY SCREEN
QUICKLY AND EASILY**

*Lifting systems are available
in both frame mounted and
cover mounted designs.*

Reduces the Time Needed to Change Screens By Up to 75%

How It Works - QuickChange PT

The QuickChange PT features two air cylinders that are self-contained within towers mounted independently on each side of the unit. With a simple turn of a switch, the end of the cylinder rods raise up from the towers to engage a bracket on the cover or frame and lift the frame stack.

Benefits

- Saves thousands of dollars in lost production by improving inspection, reducing downtime and limiting maintenance calls
- Eliminates frame handling, reducing frame damage
- Operated simply by turning a switch

Features

- Available in 48" & 60" diameter machines, one- to three-deck systems
- Available as frame or cover mounted systems
- Retrofit kits are available for all SWECO and virtually all same-size competitive round separators
- Available with SWECO Avalanche frames, Flow-Thru Separators and PSI Sifters
- Motor start-up interlock ensures machine won't be started while QuickChange is in use
- Slow raise/lower cylinders to reduce the chance of pinchpoint accidents
